# Section 1

## Front-End Web Development

6. How does the internet actually work?

24/7 available servers — forming a library — accessed by us, users, also called clients.

Google Servers
216.58.210.46

| google.com | | |
| 216.58.210.46 | I.S.P. | DNS sever |
| Client | DNS | |

7. How do websites actually work?

HTML Code File → establishes structure
CSS Code File → styles the structure
JS Code File → behaviour to the elements in structure
→ www.codepen.io (Online Text Editor)
→ www.techcrunch.com (Tech Blog)
